WORK EXPERIENCE

Software Engineer at Stripe New York, NY

Jan 2025 - Mar 2026

Tech Stack: API Design, Ruby, Java, S3, Mongo, GraphQL

- Led API design and implementation for **Outbound Credential Reuse**, eliminating re-authorization friction and unlocking Global Payout adoption by large platforms like Turo; impacted **2M connected accounts** and **325k direct users**
- Built credential projection workflow enabling **batch processing at scale** for large platform accounts
- Designed end-to-end Notification of Change system with v2 webhook integration, **eliminating 1 hour of weekly engineering toil** and establishing foundational event modeling patterns
- Delivered crypto wallet support in v2 Payout Method architecture, enabling stablecoin transfers to **100+ countries** and driving **100% growth in monthly stablecoin volume**
- Established comprehensive integration testing suite for Payout Methods and Outbound Setup Intents, **catching multiple faulty rollouts pre-production**
- Contributed Hubble query refresh functionality to shared Java library, **expanding tooling access across Stripe engineering**
- Among top 100 AI users across Stripe engineering. Early adopter of all the available AI tools
- **Hosted team workshops** on API testing, reducing onboarding ramp-up time for new peers.

Software Engineer at Bloomberg New York, NY

Jul 2021 - Jan 2025

Tech Stack: Python, C++, Airflow, Spark, Kafka, RabbitMQ, S3, SQL

- Designed microservice and database automating client data export billing, **cutting manual operations by 95%**; introduced auditing feature that significantly **reduced debugging time**
- Re-architected reporting pipeline with improved observability and retry mechanisms with **Airflow**; integrated SSO for authentication and role-based access management
- Drove cross-functional integration of upstream chat event types into client reports, ensuring data privacy and security compliance
- Built monitoring watchdog for daily export jobs, **improving report delivery reliability**
- Spearheaded Culture Council organizing team-building and 2 hackathons; participated in recruiting events and diversity initiatives

Software Engineer Intern at Qualcomm

Jun 2020 - Sep 2020

- Automated ISP code generation, **saving 800+ engineering hours** across 200+ modules

EDUCATION

University of Washington

Sep 2019 - June 2021

M.S. in Electrical and Computer Engineering

National Chiao Tung University

Sep 2015 - Jun 2019

B.S. in Electronics Engineering & Interdisciplinary in Computer Science
